

Increase the size of our free off-grid network.
Operate small battery-powered radios to
exchange text.

Em-power the
SHEBOYGAN
MESH

Virtue is its own reward. Merely keeping
your radio charged and powered up
contributes valuable bandwidth to the Mesh.

Meshtastic runs on small, cheap, low-power
radios that communicate in a Mesh without a
central server or any single-point of failure.
Please help us build a more robust local
network by purchasing any compatible radio
through the Internet and installing it at your
premises.
